Course Overview
The course addresses the effective management of operations in the Supply Chain . Regarding the Planning must recognize the existence of multiple levels with different objectives and planning horizons , as well as a substantial change in functional roles that span . Regarding the execution , you should seek maximum efficiency of operations based on process redesign , proper management of resources and the application of technology.

| Course Competencies                    |   |  |  |  |  |
|--|---|--|--|--|--|
| Professional<br>Competency             | CP4 operates effectively between different areas of a company, both locally and internationally, understanding their interrelationship and designing processes; and develop strategic business plans and to achieve the objectives of the company's short and long-term acting with empathy in their interaction with other   |  |  |  |  |
| Level of<br>Professional<br>Competency | N2 identifies the different areas and processes developed in enabling companies clearly identify the information flows that take place within the same  |  |  |  |  |
| USIL General<br>Competencies           | <ol> <li>2 Bilingual communication: Develops in English using the four language skills: listening, reading comprehension, oral production<br/>and written production, with dexterity and fluency for personal, academic and professional performance.</li> <li>4 Resource management: Manage resources efficiently, effectively and ethically, in a dynamic and competitive environment,<br/>contributing to the sustainable development of the country.</li> </ol> |  |  |  |  |

| Course Learning Outcomes   |      |  |  |  |  |
|--|------|--|--|--|--|
| General Learning Outcomes  | No.  | Specific Learning Outcomes   |  |  |  |
|  | 1.1. | It understands concepts and models supply chain linking process forward in a business environment .                                |  |  |  |
| Supply chain planning with vision processes for commercial, industrial or local or transnational services company. | 1.2. | Applies the concepts and models supply chain based on criteria of productivity improvement in individual cases in an organization. |  |  |  |
|  | 1.3  | Supply Chain Planning an organization using the concepts and models suplly chain in<br>a global environment                        |  |  |  |

|      | Activity Scheduling |        |        |  |   |                                     |  |  |

Methodology

Employs an active and participatory methodology that combines theory with practical cases, discussions, debates and exercises in addition to the final project.

| sessment Sy | stem |

Assessment System
Each of the items of the evaluation scheme and the final grade of the course are rounded to whole numbers. The final grade of the course is the weighted average of the corresponding items:
permanent evaluation, partial exam and final exam.

| ype Evaluation        | %Weighing | Observation | Week<br>Assessment | Rezag. |
|-----------------------|-----------|-------------|--------------------|--------|
| valuación Permanente  | 65%       |             |                    |        |
| Promedio 1            | 35%       |             |                    |        |
| Actividad 01          | 60%       |             | 14ta               | No     |
| Actividad 02          | 40%       |             | 14ta               | No     |
| Promedio de Prácticas | 30%       |             |                    |        |
| Práctica 1            |           |             | 3ra                | No     |
| Práctica 2            |           |             | 6ta                | No     |
| Práctica 3            |           |             | 10ma               | No     |
| Práctica 4            |           |             | 13ra               | No     |
| Trabajo               | 35%       |             | 14ta               | No     |
| xamen Parcial         | 20%       |             |                    |        |
| Examen Final          | 15%       |             |                    |        |

General Guidelines

# Title III: Attendance

Article 11: Attendance to theory lessons, practice lessons, lab sessions and workshops is regulated in each course's syllabus.

Article 12: The student will be able to do the follow -up of their attendance record in Infosil. In case he notices an irregularity, there is a three-day deadline (working days) to ask for an official revision of it.

# Title V: Evaluation process

Article 23: The student who does not take one or more exams of the Ongoing Evaluation will be able to ask for a make-up exam of only one of them only if the syllabus allows it. The Academic Calendar indicates the deadline for requesting a make-up exam, the date to pay for it, the fee and the dates when it will be administered. This exam will be about all the topics developed in the syllabus and will replace the exam the student did not take.

Article 24: The student who fails to sit for either Mid- term or Final exam on the scheduled date provided in the academic calendar, will be able to take a make- up exam. This grade will replace the exam the student did not take. The student will have 2 (two) days following the day he/she was absent to request the make- up evaluation through Plataforma Institucional. The corresponding fee must be paid in order to process the request.

Article 25: The exams have to be taken personally and in-campus or in the branches authorized by the Academic Vice-Presidency. In case that branch is not the regular one where students have their lessons, they will be previously informed. Exams taken through the Virtual Campus are an exception to this article Midterm, final and make-up exams of the e-learning mode will be administered in-campus, in the classrooms assigned by the university

## Course Specific Rules

| Attendance Policy   |   |
|---|---|
| Total Percentage Absences Permitted   | 30%                                       |
| The students who reaches or exceeds the total percentage absences permitted for the course, defined by the total of effective hours, will not be able to take the final exam or the equipment of the students who reaches a student of the student of | uivalent evaluation defined by the course |
| coordination and therefore will get zero (00) as the score.   |   |
