

Computer Fundamentals

Faculty	Course Type	Credits	Prerequisites	Semester
Mr. Siddharth Madhok	Core	4	None	Any

Brief Overview

This course is meant to equip students with fundamental knowledge of all important applications of computers. This would involve understanding concepts and applying them in academic, industrial and other spheres. The course will not include coding or any other fields of computer science / studies.

Course Objectives

At the end of the course the students are expected to:

- Understand the extent of the applicability of computers in today's world
- Be able to apply all the concepts learnt in class with regard to various computer applications

Teaching Methodology

The course is conducted mostly through interaction based lecture method, with regular class leads by the students and application based project work. The students will also complete tutorials meant to be done at home.

Requirements

Students are expected to –

- Complete all required reading for each scheduled class as per the course outline,
- Actively participate in class activities and discussions, and
- Complete all evaluative processes for successful course completion!
