

Module	Advanced Financial Management
Course code	BABSH-AFM
Credits	5
Allocation of marks	20% Continuous Assessment
	80% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Critically evaluate the impact of financial decisions on the strategic direction of the organisation
2. Identify and evaluate the exposure of a company to financial risk and the techniques required to manage this risk
3. Explain alternative sources of finance and investment opportunities and their suitability in particular circumstances
4. Evaluate complex investment appraisal situations and appreciate the importance of the cost of capital to the organisation and how the capital structure chosen will impact upon this
5. Analyse the key strategic financial issues that must be considered in an acquisition or merger, including valuation of the target company
6. Analyse a company's performance and make appropriate recommendations.

Module Objectives

This module follows on directly from *Financial Management* covered earlier in the programme. The elements outlined in the module curriculum of *Financial Management* will also be addressed as part of this module.

The objectives are to:

- Further explore the principles outlined in *Financial Management*
- Introduce topics appropriate to the strategic aspects of finance including the impact of risk on the organisation and the various techniques to manage same; calculation of the cost of capital; corporate reorganisation; corporate governance and the global financial environment.
- Provide the learner with the skills to evaluate complex investment situations

Module Curriculum

Objectives of Financial Management

- The relationship between Financial Management and Financial and Management Accounting
- Identify and describe the financial objectives of organisations
- Identify the various stakeholders and their objectives
- Examine Agency Theory and the ways to achieve shareholder objectives
- Financial objectives in Not-For-Profit organisations

Advanced Investment Appraisal

- Advanced capital investment decisions.
- Impact of inflation and taxation in investment appraisal process
- Risk and uncertainty in investment appraisal including sensitivity analysis, use of a risk adjusted discount factor, simulation, probability analysis and scenario analysis.
- Specific investment decisions (lease or buy decisions; asset replacement, single period capital rationing)

Cost of Capital and Capital Structure

- Calculation of the cost of various sources of finance
- Calculation of the Weighted Average Cost of Capital (WACC)
- Use of Dividend Valuation Model and Capital Asset Pricing Model (CAPM)
- Understand the various theories regarding the optimal capital structure

Business Valuations

- Rationale for mergers and acquisitions
- Methods of financing an acquisition including cash, debt and share for share exchanges.
 - Defence tactics against a hostile takeover.
 - Regulatory aspects of mergers and acquisitions.
- Models for the valuation of companies (asset based, income based and cash flow based models).
- Efficient Market Hypothesis (EMH) and the practical considerations in the valuation of shares

Risk Management

- Nature, types of risk and approaches to risk management
- Hedging techniques for foreign currency risk including:
 - currency of invoice
 - netting and matching
 - leading and lagging
 - forward exchange contracts
 - foreign currency options
 - money market hedging
 - asset and liability management

Hedging techniques for interest rate risk including:

- matching and smoothing
- asset and liability management
- forward rate agreements

Performance Appraisal

- Analysis of the performance of an organisation
- Understand the key ratios (profitability, liquidity, efficiency, gearing and investor) which are used in the evaluation of a company's performance
- Interpret the results and make recommendations for improvement

BA (Hons) in International Hospitality Management

STAGE 1

Module	Financial Accounting
Course code	BAIHH-FA
Credits	5
Allocation of marks	30% Continuous Assessment
	70% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Analyse the role of accounting in different types of business entities in the hospitality industry
2. Determine the information needs of the different user groups of financial accounting
3. Demonstrate an understanding of accounting terminology, basic accounting concepts and principles
4. Employ the techniques of double entry accounting to various financial transactions in business
5. Choose the correct accounting treatments for current and non-current assets and liabilities, revenue, expenses and equity
6. Prepare and present basic financial statements for sole trader organisations in the hospitality industry
7. Respond to specific accounting problems through the preparation of control accounts, bank reconciliations and depreciation calculations of non-current assets.

Module Objectives

This module introduces learners to basic accounting concepts and principles, and explains how they apply to business entities. It exists to ensure that learners are aware of the importance of the recording and management of money to the success of an organisation. Moreover, this module allows learners the opportunity to deal with specific accounting situations that arise in business entities in the hospitality industry. Furthermore, learners respond to various scenarios to prepare year-end financial statements for organisations in the hospitality industry.

Module Curriculum

Introduction to Accounting:

- Role of accounting
- Various business entities
- Users of accounting information
- Types of financial transactions
- Regulatory framework

Accounting Principles and Concepts:

- Terminology
- Accounting concepts – prudence, going concern, accruals
- The accounting equation

Accounting Records, Procedures and Systems:

- Books of original entry
- Theory and practice of double-entry bookkeeping
- Ledger accounts
- Trial balance

Recording Transactions and Events:

- Capital and revenue expenditure
- Accounting for inventory
- Cost of goods sold
- Journals and suspense accounts

Accruals and Prepayments:

- Definition of accruals and prepayments
- Preparation of ledger accounts for accruals and prepayments
- Impact of accruals and prepayments on final accounts

Depreciation of Non-Current Assets:

- Definition of depreciation of non-current assets
- Straight-line depreciation calculation
- Reducing balance depreciation calculation
- Preparation of ledger accounts for depreciation
- Profit/Loss on disposal of non-current assets
- Impact of depreciation on final accounts

Control accounts and Bad Debts:

- Introduction to control accounts
- Bad debts
- Provision for bad/doubtful debts

Bank Reconciliation Statements:

- Explanation of business bank statements
- Recognition of errors in bank statements and business records
- Correcting the business bank account
- Preparing a bank reconciliation statement

Income Statement:

- Preparation of comprehensive income statement
- Sole trader in hospitality
- Recognition of significance of profit/loss

Statement of Financial Position:

- Preparation of statement of financial position
- Delineation of assets, liabilities and capital
- Sole trader in hospitality

Module	Information Technology Skills
Course code	BAIHH-IT
Credits	5
Allocation of marks	100% Continuous Assessment

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

- Demonstrate essential skills in the application of the key components of information technology
- Select appropriate IT skills to facilitate their educational and professional development.
- Describe how IT concepts shape the business environment
- Demonstrate advanced practical skills in the most common office applications such as MS Word, MS Excel, MS PowerPoint and MS Access.

Module Objectives

The objectives of this module are to outline the role of IT and IS processes so as to enable business learners to understand their importance and to show how they can be effectively utilised to the benefit of an organisation. The module also seeks to enable the learners to develop practical IT skills which are an essential component of the modern business environment. Finally it seeks to develop the learners' understanding of general IT concepts to see how they can be used in the business world

Module Curriculum

- Role of IT in business and related Information systems applications
- Relationship between IT and business
- What are Information systems?
- Types of information systems
- Business applications as Information systems
- Information systems security

- Internet
- Business email in Practice
- Browsers and search engines
- Successful web browsing and effective search techniques
- Networks

- Databases
- Introduction to databases
- How is a database used
- Database objects
- How to design and create a database
- Implementing a database

- Business and Office applications
- Microsoft Access
- Introduction to setting up a database
- Database objects
- Tables
- Queries
- Forms
- Reports
- Relationships

- Microsoft Excel
- Spreadsheet terminology and useful tips
- Spreadsheet formatting including conditional formatting
- Spreadsheet formulae including advanced financial functions
- Lookup functions and Pivot Tables for analysing data
- Spreadsheet tools to aid managerial decision making including what if scenario modelling and Goal seeking tools
- Advanced Spreadsheet charts and other useful objects
- Spreadsheet layout and printing for the efficient manager
- Working with multiple spreadsheets and linking them together

- Microsoft Power point
- Uses of PowerPoint
- Designing a presentation
- Building a presentation
- Using the master slide
- Enhancing a presentation with advanced animation
- Running the presentation and advanced options while presenting

- Microsoft Word
- Creating and editing a word document
- Formatting a word document including advanced formatting
- Use of tables in word
- Use of SmartArt tools
- Styles and setting up a table of contents
- Inserting objects in a word document
- Advanced features
- Linking word with other applications

Module	Principles of Economics
Course code	BAIHH-POE
Credits	5
Allocation of marks	30% Continuous Assessment
	70% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Explain the forces driving demand and supply and their impact on market conditions.
2. Calculate and interpret various economic parameters such as equilibrium price and quantity, elasticity, average costs, marginal costs etc.
3. Debate and explain topical economic problems and issues confidently.
4. Classify firms into different market structures and show how competitive structures influence the individual firm's behaviour
5. Apply economic analysis to everyday problems in real world situations.
6. Explain the objectives of government macroeconomic policy and describe how they can be pursued through fiscal and monetary policy
7. Describe the causes and consequences of inflation and unemployment
8. Explain how exchange rates and interest rates are determined.

Module Objectives

Economics underpins a great deal of decision-making not only in business but also in our everyday lives and as such is an essential cornerstone of this programme. Economics is typically divided into two main branches namely microeconomics and macroeconomics. While macroeconomics is concerned with the economy as a whole microeconomics examines the individual parts of the economy and focuses on how individuals and firms make decisions and how these decisions interact.

This module is designed to introduce learners to the fundamentals of economics by exposing them to the principal theories and models used by economists. It demonstrates how economics can be used by individuals and businesses alike to assess problems and develop solutions. It also examines the wider macroeconomic environment and the principles underlying monetary and fiscal policy.

Module Curriculum

Introduction to Microeconomics

- What is Economics?
- The Economic Problem: Scarcity and Choice

Determining Price

- Demand and Supply

- The Determinants of Equilibrium Price and Quantity
- Government Actions in Markets

Elasticity

- The Responsiveness of Demand and Supply
- Cross Price Elasticity of Demand and Income Elasticity of Demand
- Relationship between Elasticity and Total Revenue

Costs and Production

- The Firm's Supply Decision and Cost Behaviour
- Long Run Total, Marginal and Average Costs
- Short Run Costs and Diminishing Marginal Returns
- Returns to Scale

Market Structures

- Perfect Competition
- Monopoly
- Monopolistic Competition
- Oligopoly
- Government Regulation and Intervention

Introduction to Macroeconomics

- Macroeconomic Objectives
- The Circular Flow of Income
- Measuring National Income
- Economic Growth and The Business Cycle

The Determination of National Income and the Role of Fiscal Policy

- Equilibrium Level of National Income
- Keynesian Theory and the Multiplier
- The Role and Effectiveness of Fiscal Policy

Money and Banking

- How Banks Create Money
- Money Multiplier
- Measures of Money and the Money Supply
- The Role of the Central Bank and The European Central Bank
- Instruments and effectiveness of Monetary Policy
- Interest Rate Determination

Unemployment, Inflation and Growth

- Types of Unemployment
- Causes and Consequences of Inflation

- Demand Side and Supply Side Policies

Exchange Rates

- Balance of Payments Account
- Determining Exchange Rates
- Fixed versus Floating Exchange Rates

International Trade

- Gains from Trade
- Restrictions on Trade
- Trading Blocs

STAGE 2

Module	Marketing Management and Research
Course code	BAIHH-MMR
Credits	5
Allocation of marks	40% Continuous Assessment
	60% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Assess the main tasks and concepts associated with marketing management and the marketing research process
2. Illustrate an understanding of the underlying concepts of marketing research, such as, market segmentation, targeting and positioning and their impact on marketing management decisions
3. Examine the important changes that the Internet and web-based technologies, such as social media and mobile applications, are making to the hospitality marketplace.
4. Assess the effectiveness and performance of a marketing plan to include the marketing mix strategy
5. Explain the factors influencing buyer behaviour in both the traditional and online channels
6. Employ skill in the design and presentation of examples of research methods.
7. Discuss the international trends and changes in the marketing environment, as they relate to the international hospitality industry
8. Discuss ideas clearly and professionally.

Module Objectives

This module builds on the 'Principles of Services Marketing' module studied in Stage 1 of the programme. The module is designed to provide learners with an integrated knowledge of strategic issues in marketing to include market research and their implications for management decision-making. Using an integrated approach in the module delivery enables the research process to be understood and applied concurrently.

Module Curriculum

Introduction to Marketing Management and Research:

- Defining Marketing in the Hospitality and Travel Industry
- Marketing fundamentals
- The characteristics of a marketing orientation
- Reasons for Increased Importance of Marketing in the Hospitality Industry

The Marketing Environment:

- Micro Environmental factors:

- The organization
- Suppliers
- Intermediaries
- Competition
- Customers
- Macro Environmental Factors:
 - Demographic
 - Economy
 - Social/Cultural factors
 - Technology
 - Political/Legal
 - The Natural environment

Services Marketing

- Characteristics of Services Marketing
- 7P's and their application in Hospitality and Travel Marketing
- Implications for the Marketing Mix on-line
- Managing Differentiation

Digital Marketing

- Website navigation
- Search Engine Optimisation
- Online bookings and up-selling
- Electronic distribution channels and linkages
- Social media
- Mobile technology and consumer generated media

Buyer Behaviour

- Decision-making process
- Traditional channels and online
- Influences on the decision

The Marketing Plan

- Purpose and benefits of a plan
- Goals, objectives, strategies and tactics

Market Segmentation

- Segmentation
- Targeting
- Positioning

Marketing Research 1

- Types of Research
- The Research Process
- Primary versus Secondary
- Quantitative versus Qualitative

Marketing Research 2

- Data Collection Methods

- Interviews
- Questionnaires
- Observation

Module	Human Resource Management
Course code	BAIHH-HRM
Credits	5
Allocation of marks	50% Continuous Assessment
	50% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Examine the role of HRM within hospitality organisations and the main issues involved in people management in the services sector.
2. Illustrate a working knowledge of human resource management theory and practices within a business environment context
3. Assess the impact of reward in managing performance
4. Report on the qualities required to ensure good teamwork through effective supervision
5. Demonstrate an understanding of the stages of human resource development
6. Discuss the implications of employment laws in the hospitality industry
7. Display an understanding of the role of line managers/supervisors in building effective teams

Module Objectives

This module builds on the 'Organisational Behaviour' module studied earlier in the programme and aims to provide learners with an in-depth understanding of managing human resource within the hospitality industry.

Factors such as recruitment and selection, training, employee deployment and development, performance, and motivation are examined in detail.

In addition, the module is designed to provide learners with a clear knowledge of the laws relating to employment, benefits, work practices, and health and safety issues within hospitality organisations.

Module Curriculum

Introduction to Human Resource Management

- Personnel Management v Human Resource Management

Developing the Human Resource:

- Performance Management
- Appraisal & Feedback
- Staff productivity
- Staff Training and Service Quality
- Employees as Competitive Resource
- Management Development
- Staff Motivation

Reward and Remuneration

- Payment and reward Systems
- Employee benefits
- Job Evaluation
- Incentives
- Absenteeism & sick Pay
- Exit Interviews

The Employment Relationship

- Labour turnover
- Employee Relations
- Labour unions
- Collective Bargaining
- Employment Law
- Labour costs

International Performance Management

- Challenges to monitoring international employees
- Appraisal and feedback
- Contextual Issues

Contemporary Issues in HRM

- Organising HR
- Managing People
- Managing global employees
- Employer Branding
- Corporate Social Responsibility
- Business Ethics

Module	Rooms Division Management
Course code	BAIHH-RDM
Credits	5
Allocation of marks	70% Continuous Assessment
	30% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Identify the key functions of the Rooms Division department
2. Associate the role of the Rooms Division Manager with the management function of a hospitality provider in an effective manner
3. Explain the rooms division manager/front office manager's role as leader and decision maker
4. Discuss the importance of the Rooms Division department in the service provision within the hospitality context
5. Demonstrate the basic techniques of reservations, registration, room allocation and guest accounting
6. Examine the role of Revenue Management and its application within the Rooms Division department
7. Design standard operational procedures that can be utilised in the management of guest services
8. Identify and examine the various technology packages used in the management of the rooms division department
9. Explain the role of Rooms Division managers in managing human resources.

Module Objectives

This module focuses on the key principles of room's division management within the international hospitality industry. It provides learners with an insight into this dynamic hospitality sector and demonstrates to them the importance of this department as a major revenue generator with the lodging sector. It also gives the learner's the opportunity to develop their operational and management knowledge of this key functional department.

This module aims

- To provide learners with a full appreciation of the aspects of managing the rooms division department
- To enable learners to identify and critically examine the role of the rooms division manager in the management of lodging operations
- To ensure learners are fully aware of the importance of providing customers with quality lodging services
- To enable learners to identify the rooms division manager's role as a leader and decision maker.

Module Curriculum

The hotel Industry

- The traditional and modern hotel
- The structure of the hotel industry

Room division management

- Overview of the front office department
- The role of the rooms division manager

The reservations process

- Forecasting availability and overbooking
- Revenue Management
- Global reservations technologies
- Individual reservations and group reservations

Guest services and rate structures

- Managing guest services
- Arrival, registration, assignment and rooming
- The role of the room rate

The hotel revenue cycle

- Billing the guest
- The night audit
- Hotel technology.

Module	Management Accounting
Course code	BAIHH-MA
Credits	5
Allocation of marks	30% Continuous Assessment
	70% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Recognise and explain the component features involved in management accounting in terms of decision making, planning and control of costs and profits
2. Identify and assess new management accounting techniques being developed and implemented by pro-active organisations in the international hospitality industry
3. Define the principles of costing and apply them in industry situations
4. Describe costs by classification, behaviour and purpose
5. Assess the performance of a business from both a financial and non-financial perspective
6. Identify and explain cost behaviour patterns and apply cost-volume-profit analysis
7. Prepare and present budgets for planning, control and decision-making
8. Calculate, interpret and investigate basic sales and cost variances
9. Use management accounting techniques to make and support decision-making
10. Explain the process of payroll and the statutory deductions which employers must comply with.

Module Objectives

This module is designed to strengthen and develop the learners' financial accounting ability and provide a thorough grounding in management accounting systems and procedures operated in the hospitality industry. The module aims:

- To ensure learners have the ability to capture and analyse accounting information and can apply it to a wide range of planning, control and decision making situations
- To encourage learners to fully appreciate the management processes of planning, control and decision-making.

Module Curriculum

Introduction to cost and management accounting

- The management accounting function in the hospitality industry
- The relationship between management accounting and financial accounting

Basic cost concepts

- General nature of costs
- Determination of mixed cost elements
- Fixed versus variable costs
- Overhead, controllable, differential, relevant, sunk, and opportunity costs
- Average and incremental costs

Costing systems

- The role of costing in service sectors
- Absorption costing
- Marginal costing and the importance of contribution for decision-making
- Comparison of marginal costing and absorption costing approaches

Cost Volume Profit analysis

CVP Analysis and the importance of contribution

- Target profit or revenue
- Breakeven charts and profit/volume charts
- Limitations of CVP analysis

Ratio analysis

- Ratio standards
- Purpose of ratio analysis
- Classes of ratios
- Liquidity, solvency, activity, profitability and operating ratios
- Limitations of ratio analysis
- Usefulness of financial ratios

Forecasting methods

- Forecasting in the hospitality industry
- Overview of forecasting methods
- Selection of a forecasting method
- Short-term forecasts in the lodging industry
- Forecasting cases

Operations budgeting

- Types of budgets and reasons for budgeting
- The budget preparation process
- Budgetary control
- Determination of variances & significant variances
- Variance analysis
- Determination of problems and management action

Cash management

- Cash and its importance
- Distinction between income and cash flows
- Cash budgeting
- Float

Payroll

- Introduction to payroll
- Statutory deductions
- Pay slip requirements
- Payroll packages.

STAGE 3

Module	Finance and Revenue Management for Hospitality Managers
Course code	BAIHH-FRHM
Credits	10
Allocation of marks	40% Continuous Assessment
	60% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Describe the financial environment within which organisations must operate, the financial objectives of various types of organisations and the requirements of various stakeholders
2. Explain alternative sources of finance, their suitability in particular circumstances and the function of capital markets
3. Assess the factors affecting investment decisions and opportunities presented to an organisation
4. Demonstrate a sense of judgement in managing working capital
5. Analyse a company's performance and make appropriate recommendations.
6. Apply economic theory to optimise revenue and evaluate the most appropriate strategy for a hospitality manager to employ in order to optimise revenue.
7. Differentiate between revenue maximisation and profit maximisation
8. Ensure international revenue management practices are informed by reading and research at the forefront of the tourism and hospitality field

Module Objectives

This module introduces Financial Management and its application in practice. The module focuses on the critical elements of financial decision making for organisations, including investment decisions, sources of finance, management of working capital and performance appraisal.

The emphasis is on the practical application of theory to the leisure environment so that graduates can draw on their academic studies to inform their own practice.

The objectives are to:

- Provide learners with an in-depth understanding of the link between company decision-making and the operation of capital markets
- Ensure learners understand and appreciate the strong linkages between finance and globalisation
- Demonstrate the importance of working capital management and the tools to manage it
- Help the learner explore the financial environment in which firms and managers must operate.

Module Curriculum

Objectives of Financial Management

- The relationship between Financial Management and Financial and Management Accounting
- Identify and describe the financial objectives of organisations
- Identify the various stakeholders and their objectives
- Examine Agency Theory and the ways to achieve shareholder objectives
- Financial objectives in Not-For-Profit organisations

Investment Appraisal

- An appreciation of the various evaluation techniques:
 - Payback Period
 - Accounting Rate of Return
 - Net Present Value
 - Internal Rate of Return
- Understanding Discounted Cash Flow
- Identifying relevant Cash Flows
- Impact of taxation

Management of Working Capital

- Understanding the Working Capital Cycle
- Funding of Working Capital
- Problems of Overtrading
- Cash Management, including Cash Budgets
- Sources of short-term finance
- Management of Receivables – credit evaluation, setting credit policy, offering discounts, systems and techniques to control receivables, factoring, invoice discounting
- Management of Payables – important source of finance, impact of discounts offered
- Management of Inventories – use of various models e.g. Economic Order Quantity (EOQ) and Just-in-Time (JIT). Evaluate impact of discounts offered for bulk-buying.

Sources of Finance

- Understanding the impact of Share Capital and Loan Capital on the organisation
- Identifying various providers of finance
- Appreciating the features of the various instruments and their suitability to the organisation
- Leasing – operating and finance leases; sale and leaseback; lease or buy decisions
- Bank Finance
- Venture Capital/Business Angels
- Government sources of finance

Performance Appraisal

- Analysis of the performance of an organisation
- Understand the key ratios (profitability, liquidity, efficiency, gearing and investor) which are used in the evaluation of a company's performance

- Interpret the results and make recommendations for improvement

Introduction to Revenue Management

- The purpose of revenue management
- The linkage between revenue management and financial management
- Strategic pricing
- Applications to the hospitality industry

Revenue Management for the Hospitality Industry

- Forecasting demand
- Inventory control and price management
- Distribution channel management
- Revenue management for food and beverage services
- Evaluation of revenue management efforts
- Ten principles of revenue management
- Applications to the hospitality industry

Revenue Management in Action

- Specialised applications of revenue management
- Building better business

Module	Conference and Events Management
Course code	BAIHH-CEM
Credits	5
Allocation of marks	40% Continuous Assessment
	60% Final Examination

Intended Module Learning Outcomes

On successful completion of this module learners will be able to:

1. Explain the complexity and wide-ranging scope, role and purposes served by international conferences /events and the key players involved in this industry.
2. Discuss the possible future trends and developments in the international conference/ event sector.
3. Demonstrate a comprehensive knowledge of the details involved in planning and designing an international event / conference, including the management of resources, budgets and time.
4. Discuss the economic, social, political and environmental effects of international conferences/events on a host destination.
5. Analyse the role played by promotion, advertising, public relations and sponsorship in marketing international events.
6. Employ research skills in sourcing relevant information to support coursework.
7. Contribute to class discussion on topics relevant to the international conference and event sector.
8. Judge and apply professional and ethical standards applicable to the international conference and event sector.

Module Objectives

This module is designed to provide learners with an in-depth understanding of the complexity and wide-ranging scope, role and purposes served by international events/conferences. It allows learners the opportunity to examine the key management systems and processes used in the field of conference and event management. The module deals with planning and designing an event/conference, including the management of resources, budgets and time and examines the economic, social and environmental impacts of international events on host communities/destinations. Learners analyse the role played by sponsorship, public relations and new multimedia technology used in marketing international events.

This module aims:

- To enable learners to focus on the diverse nature of the international events and conference industry and to discuss the key players involved;
- To allow learners to develop an in-depth understanding of the economic, social, and environmental impacts of international events / conferences
- To provide learners with a clear understanding of how to manage the key processes involved in the conference and events industry
- To provide learners with a clear understanding of the key trends, developments, challenges and opportunities affecting the international conference and events industry.

Module Curriculum

The International Meetings, Expositions, Events, and Convention Industry (MEEC)

- An overview of the MEEC industry
- MEEC Organisers and Sponsors
- The Key Players in the MEEC industry.

Management, Feasibility and Development of International Conferences and Events

- A model, processes, system of a body of knowledge
- The event management environment: complexity and uncertainty
- Phases of event management and the event life cycle.

The International Event Management System

- The event project
- The Management Framework
- The developing event: a maturity model

International Event Management Processes (1)

- A process model for events
- Scope management
- Stakeholder management
- Sponsorship
- Event design
- Marketing process
- Financial process.

International Event Management Processes (2)

- Time management process
- Risk management process
- Communication process
- Procurement process
- Human resources process.

International Event/Conference Marketing

- Event sponsorship
- Marketing process, communications and public relations
- New multimedia technology for event organisers.

The Economic, Social and Environmental Impacts of International Conferences and Events

- Factors affecting conference and event sector demand
- The economic impact of the conference and events industry
- Social impacts and legacies of international conferences and events
- Environmental impacts and sustainability issues.

The Future: Trends, Challenges and Opportunities facing the International Conference and Events Industry

- Drivers for change in the global conference and events industry
- Developments in technology
- Virtual events
- The transferable personal skills of an event manager.

Module	Contemporary Issues in Hospitality
Course code	BAIHH-CIH
Credits	5
Allocation of marks	40% Continuous Assessment
	60% Final Examination

Intended Module Learning Outcomes

On successful completion of this module learners will be able to:

1. Demonstrate an understanding of the health and wellness industry and wellness geared experiences.
2. Determine the theoretical underpinnings of the health and wellness tourism industry.
3. Analyse current trends and developments affecting health and wellness tourism.
4. Evaluate the economic and social benefits of health and wellness tourism.
5. Demonstrate an in-depth understanding of the key dynamic forces and developments which may lead to crisis issues in international tourism and hospitality and their subsequent impact on a business or a destination.
6. Discuss and critically appraise the importance of crisis prevention and be able to predict which types of crises and issues may occur.
7. Critically examine the responsibility the tourism industry has towards sustainable measures and analysis its commitment from a local, national and global prospective.
8. Recognise and value the scope of change required to move towards a more sustainable future for the tourism industry.

Module Objectives

This module is designed to provide learners with a diverse and current knowledge of the contemporary issues within the overall global tourism and hospitality sector. The module examines the contemporary issues in tourism and hospitality such as Health and Wellness Tourism, Crisis Management and Sustainability in Tourism and Hospitality. Learners investigate how the tourism sector is responding to such contemporary issues and will identify opportunities and challenges these issues may present.

Module Curriculum

Health and Wellness Tourism

Trends contributing to wellness tourism

- Holistic health and increased health consciousness
- Pace of life acceleration
- Quest for spirituality

Towards a conceptualisation of wellness tourism

- Theoretical underpinning of health and well-being.
- Defining health and wellness tourism

- Primary purpose and secondary purpose wellness traveller
- Culturally different meanings of health related tourism
- The role of the environment, natural and cultural resources
- Economic and social impacts of health and wellness tourism

Drivers of wellness tourism development

- Motivations of wellness tourists
- Characteristics of wellness tourists
- The globalisation of health and wellness

The Spa industry and Nature based wellness tourism

- Diversity of Spas
- Emerging types of spa and wellness facilities
- Relationship between nature, wellbeing and destinations
- The links between parklands and health
- Parklands and nature reserves as a wellness tourism destination

Crisis Management in the Hospitality and Tourism Industry:

Introduction to Disaster and Crisis Management:

- Definition and characteristics of a Crisis
- Theory of Crisis Domains – Developmental, Situational, Existential and Environmental
- Reputation as a valuable asset
- Trust and belief
- Dynamic forces impacting on organisations

Crisis Situations:

- Business Crisis issues
- Product – related Crisis
- Predicting future crisis issues

Planning for the unexpected:

- Planning to manage a crisis
- Strategic Crisis management team
- Crisis prevention
- Crisis aftermath – what can be learned?

Sustainability in Hospitality:

- Origins and evolution of the sustainability concept
- Economic, Social and Environmental factors – the triple bottom line
- International sustainability: agreements, policies, legislation and their effectiveness (Rio, Johannesburg, Agenda 21)
- Indicators for sustainability: types of indicator models, measuring for sustainability, challenges, functions and features of indicators

The future of sustainability – what does it hold? Past and present success and failure examples. Holistic, strategic, ongoing process

BA (Ord) in Marketing

STAGE 2

Module	Market Research Practice
Course code	BAMO-MRP
Credits	5
Allocation of marks	50% Continuous Assessment
	50% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Define the role, scope and relevance of market research to decision making in business
2. Apply the tools and methods used by market researchers for making decisions
3. Carry out standard market research activities
4. Design basic data collection tools
5. Display findings of market research in a concise and clear way
6. Apply ethical standards and concerns when conducting market research

Module Objectives

This module has been specifically designed to offer learners an understanding of the role and importance of market research within organisations, with particular emphasis on the role of market information in decision-making. The main objective of this module is to help learners to understand the central concepts of market research, the available methods of conducting research and how to use research to solve the problems/opportunities a company may face.

Module Curriculum

Introduction to Market Research

- The role of market research
- Gathering market intelligence- project management
- Sources and types of information
- Defining the research problem and forming objectives

Research Design

- Qualitative research methods
- Quantitative research methods
- Selecting research design approach

Data Collection Methods

- Focus groups, in-depth interviews, projective techniques
- Questionnaire design, observation, panels

Data Collection

- Developing a sampling plan
- Collection methods – face to face, phone, online.
- Fieldwork
- Sampling errors and response rates

Data Analysis

- Preparing the data
- Forms of analysis
- Making sense of the numbers
- Qualitative data analysis

The Research Report

- Writing standards in research reports
- Format of the research report
- Oral presentation and visual aids

Module	Principles of Economics
Course code	BAMO-PE
Credits	5
Allocation of marks	50% Continuous Assessment
	50% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Explain the forces driving demand and supply and their impact on market conditions
2. Calculate and interpret various economic parameters such as equilibrium price and quantity, elasticity, average costs, marginal costs etc.
3. Debate and explain topical economic problems and issues confidently
4. Classify firms into different market structures and show how competitive structures influence the individual firm's behaviour
5. Apply economic analysis to everyday problems in real world situations
6. Explain the objectives of government macroeconomic policy and describe how they can be pursued through fiscal and monetary policy
7. Describe the causes and consequences of inflation and unemployment
8. Explain how exchange rates and interest rates are determined

Module Objectives

Economics underpins a great deal of decision-making not only in business but also in our everyday lives and as such is an essential cornerstone of this programme. Economics is typically divided into two main branches namely microeconomics and macroeconomics. While macroeconomics is concerned with the economy as a whole microeconomics examines the individual parts of the economy and focuses on how individuals and firms make decisions and how these decisions interact.

This module is designed to introduce learners to the fundamentals of economics by exposing them to the principal theories and models used by economists. It also demonstrates how economics can be used by individuals and businesses alike to assess problems and develop solutions. It also examines the wider macroeconomic environment and the principles underlying monetary and fiscal policy.

Module Curriculum

-
- Introduction to Microeconomics
- Determining Price
- Elasticity
- Costs and Production
- Market Structures
- Introduction to Macroeconomics

- The Determination of National Income and the Role of Fiscal Policy
- Money and Banking
- Unemployment, Inflation and Growth
- Exchange Rates
- International Trade

STAGE 3

Module	International Marketing
Course code	BAMO-IM
Credits	10
Allocation of marks	40% Continuous Assessment
	60% Final Examination

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Examine the nature and diversity of international marketing environments
2. Evaluate international markets using international marketing research
3. Compare global market expansion strategies using different international market entry methods
4. Critically evaluate the mix decisions that need to be taken to support global marketing activities
5. Examine the key decision areas in planning international marketing strategies
6. Identify changing developments in marketing, including online, social media, mobile and other digital technologies

Module Objectives

Focus on domestic markets alone will not allow firms to remain competitive. International marketing enables firms to exploit growing target markets and product opportunities overseas.

In this module learners are introduced to international marketing considerations including planning and transacting across national borders. Learners are given a practical overview of the key elements of international marketing and issues businesses face when entering and operating in foreign markets. The module is designed to provide learners with an opportunity to synthesize and apply existing marketing knowledge.

Module Curriculum

The Scope and Challenge of International Marketing

- International Marketing Environments
- The Global Marketplace

Assessing International Marketing Opportunities

- Researching international markets and market behaviour
- Market Segmentation, Targeting and Positioning

Entering International Markets

- Global Market Entry Strategies
- Importing, Exporting and sourcing
- Licensing, investment and strategic alliances

Developing the International Marketing Programme

- Brand & Product decisions
- Pricing for international markets
- Communications decisions
- Channels and Distribution decisions

Organising the International Marketing effort

- Pre-internationalisation internal company considerations,
- organisation structures for international markets

International e-marketing

- e-marketing environment
- e-marketing strategy
- e-marketing management

Module	Career Planning
Course code	BAMO-CP
Credits	5
Allocation of marks	100% Continuous Assessment

Intended Module Learning Outcomes

On successful completion of this module, the learner will be able to:

1. Discuss the importance of continued professional development
2. Employ a range of soft skills developed through personal achievements, career insights and personal/professional development
3. Create short-term and long-term personal and professional plans informed by self-awareness and research
4. Prepare and adapt a professional development portfolio to meet career/educational plans
5. Identify and pursue personal strategies for seeking, continuing or changing employment or creating self-employment
6. Use professionally developed written, oral and aural communications to ensure academic and employment success

Module Objectives

This module gives the final year learner the opportunity to consider plans for their future studies and career. It provides the learner with an opportunity to record and reflect on the tangible skills, experiences and achievements developed over the duration of their studies. Furthermore, learners are encouraged to maximise the development of the soft skills which are beneficial in further education and employment.

Module Curriculum
